PRINT AND PLAY

Simply print this double sided (preferably on slightly thicker paper) and cut out the cards along the dotted lines to jump straight into this mini-case.

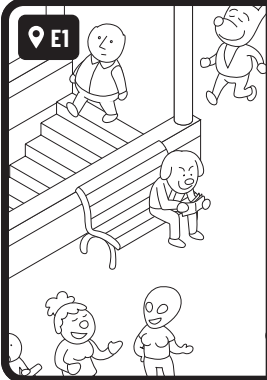

If your printer does not make front and back of the cards align, we recommend simply printing this case on two separate sheets of paper, cutting out the cards and gluing the front and back together. Of course, as always, be careful not to look at the answers before solving the case.

Have fun!

THE THIEF

Well found, detectives! The thief wanted to make an inconspicuous getaway, but his carelessly discarded newspaper put you right on his trail. He is sitting on a bench at the underground station in the north of the city.

THE CRIME SCENE

It happened at the café. The thief used a newspaper to hide the theft from passers-by and stole the purse from right in front of the blind woman!

GRANNY MAUREEN

Blind granny Maureen was robbed. While stood **at the chips stand**, she noticed her purse was no longer in her handbag.
